

# Cultured MicroAlgae: The Ultimate in Raw Food Nourishment - *RegenaFood*™

For over six years, we have searched the world over for microalgae that wasn't stale, moldy or full of toxic metals or harmful man-made chemicals. We had to discontinue products because everything we found was toxic. At last, we are happy to announce that we have found a pure microalgae that is grown in a pristine location away from pollution in mineral-rich water that is free of contamination from pesticides, herbicides and artificial fertilizers. The shelf life is far longer than other green algae products that only last one month after harvesting. How do we do this? We blend the green microalgae with supercritical CO2 *Haematococcus Pluvialis* microalgae, that is a natural anti-mold, preservative, and the most powerful of all antioxidants.

Safe, CO2 extraction techniques use carbon dioxide (*the stuff that puts the bubbles in sparkling water*) to extract nutrients hundreds of times more than whole foods. CO2 mirrors the full spectrum of nature's bounty and harnesses astonishing levels of potent, solvent-free/ preservative-free, nourishment. Microalgae is super-rich in raw protein, B vitamins and vitamins A, D and E! Plus it is loaded with organic calcium, magnesium and potassium and a wide spectrum of organic minerals. We use a state-of-the-art cultivation, extraction and processing facility that grow our microalgae in remote, pollution-free locations, in highly sophisticated cultivation facilities. The production is carried out under rigorously controlled conditions, with regular and stringent quality tests, and has been able to consistently meet the US FDA standards.

## Researchers found green microalgae to be:

- ✓ The most powerful of all antioxidants - *Nutr Cancer 1996;26*
- ✓ Nutriture which can reduce the risks of heart disease, certain cancers, macular degeneration and boost immunological resistance to infections - *J American Medical Association 272:1994; Cancer Res. 52:1999, Nutr. Cancer. 33(2):1999; Eur J Gastroenterol Hepatol 11:1999; Cancer Epidemiology, Biomarkers and Prevention. 2:: 1993; Xenobiotica. 26: 1998; Nutrition and Cancer 24:2: 1995; Marine Sciences 1991; Acta Genetica Sinica (Chinese Journal of Genetics),15:5:1988*
- ✓ The most powerful natural anti-inflammatory and nutritive for the immune system - *Nutr Cancer 1996;26; Physiological Chemistry and Physics and Medical, 1990; Nutrition of Cancer, 1996: 26:3; Journal of Nutritional Sciences and Vitaminology, 40, 431-441, 1994 Journal of Nutritional Immunology V.3(4) 1995; Immunopharmacology, 1996*

## DISCOVER RegenaFood™

- ✳ cultured, RAW, Nitrogen-flushed soft tabs from whole foods derived from nature's handiwork. Cultured food is essential to our well-being and for the body to repair the damage we inflict upon ourselves from our stress and our polluted environment. Just 2 soft tabs once a day gives above and beyond the nutriture of eating huge quantities of other raw foods!
- ✳ The most advanced and comprehensive nourishment, working to keep the body healthy—all systems in sync, with vitality and energy to spare—without risks or side effects.\*\* Get nature's recipe for superior nourishment which researchers say may help you boost your energy, reduce body fat, lower cholesterol, boost immunity, eliminate brain fog and ADD, age-proof your body, fight stress and more!\*\*

**Our Pledge of Purity:** No ingredient in RegenaFood™ is irradiated, has chemical solvents, GMOs, pesticides, mold, or synthetic or inorganic vitamins/minerals, toxic tableting materials (magnesium stearate, talc, etc) found in the majority of today's supplements (you'll rarely find them listed on the label). The ingredients are "beyond organic" foods grown on nutrient-rich and chemical-free soil from the cleanest places on earth. Every detail of making this product—from the planting, gathering, and harvesting to the testing and preparation—are meticulously supervised to insure complete freshness, potency, purity, and vitality. Now in Irradiation-proof packaging
