

ImmuFood - Immune Nourishment with Anti-Mold & Anti-Viral Nutrients

New mutant influenza strains are making it harder and harder for the innate immune system under stress to mount aggressive defenses and build antibodies to prevent re-infection. *ImmuFood™* contains nourishment to help the immune system work more aggressively against invading viruses and pathogens.

One of ImmuFood's unique ingredients is coconut water vinegar fermented algae, *Haemococcus pluvialis*, rich in astaxanthin (asta-ZAN-thin) in synergistic combination with other supercritical food spices to keep toxic and potentially lethal food-borne mold out of the body. Researchers say that astaxanthin is the most powerful of all antioxidants because it DEAD STOPS age-accelerating *singlet oxygen* type free radicals and induces powerful anti-inflammatory responses that strengthen and balance the immune system (*Nutrition & Cancer* 19: 269-80; 1993; *Int Journal of Integrative Medicine* 2:4; 2000). Unlike ordinary algae that goes moldy and rancid within hours of harvesting, our synbiotic-foodgrown™ astaxanthin is cultured and the tough cell wall of the algae are cracked open and highly unstable unless flash extracted immediately. This guarantees that the precious nutrient cargo of antioxidants quickly enter cells to protect against toxin-induced, free radical damage. Researchers say these antioxidants are up to 550 times more potent & effective than vitamin E (*Arch Biochem Biophys* 1992:297; *Arch Biochem Biophys* 1989:274).

Fermentation combined with supercritical CO₂ extraction techniques produces extremely clean, absolutely solvent-free extracts, hundreds of times more powerful than conventional antioxidant supplements. Because it freely crosses the blood-brain and blood-retina barrier, *ImmuFood™* protects cell membranes and rapidly neutralizes free-radicals (oxidative stress) at the neuron level where Multiple Chemical Sensitivity (MCS) or toxic brain reactions occur. For example, the primary cultured algae ingredient in *ImmuFood™* has been shown in a randomized, placebo-controlled, double-blind human study and animal studies that immune fortification and increased resistance to viral, bacterial, fungal and parasitic infections and a reduced incidence of coronary heart disease, certain cancers, and macular degeneration is possible (*Nutrition & Cancer* 36(1); 59-65, 2000; *Nutrition & Cancer* 21(1); 47-58; 1994; *Nutrition & Cancer* 19(3); 269-80, 1993; *Autoimmunity* 16(2); 95-102, 1993; *J Am Med Assoc* 272:1413-20, 1994; *Eur J Gastroenterol Hepatol* 11(3):305-8, 1999; *Cancer Epidemiology, Biomarkers & Prevention* 12:335-39, 1993; *Carcinogenesis* 12:2109-14, 1991). In addition, a reduced the number and size of liver lesions in aflatoxin-induced carcinogenesis (*Carcinogenesis* 19(3):403-11, 1998) and immune-regulating activities for inflammation far exceeded carotenoids tested at the University of Minnesota (*Nutr Cancer* 1996;26(3):313-24) and had protective effects of UV light on cells that were 1000 times more effective than both beta-carotene and lutein.

Give your Patients the Best Mutant Influenza Nutritional Protection

Getting ample amount of nourishment is an important part of staying healthy in today's toxic world of food-borne and air-borne pathogens. Our quality control program encompasses a field-to-shelf process, starting with the raw materials that are mold-free and non-irradiated and fresh. We utilize low temperatures and constant culture monitoring to ensure peak quality and ripeness of the algae with rapid, flash extraction methods (*extracted in a facility governed and certified by the strictest Kosher and organic processing standards that meets or exceeds the proposed FDA's Good Manufacturing Practices for dietary supplements*).

INGREDIENTS – Contains Raw Coconut Water Vinegar, Hawthorn Berry Solid extract, Supercritical CO₂ Zanthin Cultured Astaxanthin Complex, Supercritical CO₂ Organic Wheat Bran, Black Cumin Seed oil, Supercritical CO₂ Ginger Root, Supercritical CO₂ Turmeric Root

Suggested Practitioner Dosing: 1 tablespoon three times a day in 8 ounces of water at the first sign of a cold or flu. Do not take for more that 2 days.

We refuse to compromise. The quality of your nutritional supplement has everything to do with effectiveness in today's high-stress, over-cooked, microwave, and toxin-filled world. **Get the protection you deserve!**
