

# QuantaFoods, LLC - Food Ferments & Concentrates

Our products reflect our unprecedented commitment into developing advanced nutritional concepts—decades ahead of time—to help practitioners deliver living, harmonically-balanced, whole food supplements to their patients. Each formula provides instant total body nourishment, made by nature’s timeless wisdom and quorum symbiotic cycles through microbial fermentation. We call them *quorum-fermented™* nutrients and they are bound to protein carriers. These protein carriers were the focus of Nobel Prize winning research by Dr. G. Blobel who stated “each protein carries in its structure the information needed to specify its proper location in the cell.”

**IMAGINE** getting raw, living, fast nourishment. No pasteurization or nutrient-destroying chemicals stabilizers, fillers, flowing agents, or binders, magnesium stearate (commonly used in the nutritional industry). And, no mold (commonly found in other cultured- fermented and whole food products) as our proprietary anti-mold, homeopathic-like *quantic harmonization process™* maintains the freshness, nutritive value (shelf life) and vitality of our products. We spend months sourcing and testing raw materials for authenticity and purity. All of our formulas are free of isolated, synthetic “USP” vitamins, inorganic minerals, toxic solvents, GMO’s, or irradiated ingredients. We offer what nature creates in the miracle of quorum fermentation which can now concentrate nutrients 100 to 1.

**Quorum Fermentation** is the key to the long-range therapeutic effectiveness. Our proprietary *quorum fermentation* is a multistage, sophisticated lab-controlled fermentation process that makes a major difference in nutrient uptake and utilization. All nutrients are in raw formats and never subjected to oxidation or heat or harmful pasteurization as commonly used in other cultured nutritional or food products. This results in a long-lasting winning formula that nourishes the body’s inner physician to support the polarities of the brain-afferent regenerating neurons. When consuming these quorum ferments in concentrated forms, people notice immediate changes in their energy levels, moods, emotions, concentration, physical appearance, endurance, and strength.

**DISCOVER** expertly-blended formulations that enhance brain-afferent inner physician function and nourish and restore the reciprocal actions of the body’s immune, repair and detoxification mechanisms.\*\* Our nutrient delivery systems—based on breakthrough Quorum Fermentation™ technologies—help to nourish the sickest and weakest digestive systems (based on the pioneering research and the breakthrough discoveries of Dr. Paul Yanick, Jr. in the fields of Quantum Medicine™ and Quorum Nutrition™ which has already generated global recognition).

We embrace **NATURE’S RECIPE’S FOR NOURISHMENT** at *QuantaFoods, LLC* as a potential way to help us reach new limits of strength, resilience and endurance to stress. When nutrients fall below a critical threshold from sustained stress, cell regeneration slows down or stops. The repletion of quorum nutrition helps to meet the challenges of sustained, everyday stress. As modern lifestyles grow increasing hectic and more toxic, the need for quorum nourishment increases. Rich in nucleic acids and protein and thousands of nutrients, we believe that nourishment is the primary component of any anti-stress program. Don’t be fooled by “cell-resonant” claims that suppress the inner physician or “USP” synthetic supplement claims! Stress is the nation’s #1 killer. To survive and gain resilience to stress we need *Quorum Nutrition™* and the healing power of nature.\*\*
