

# Extraordinary Nourishment: *Multi-NutraFood-100x™*

Discover the only RAW, living *Saccharomyces cerevisiae* aerobic 3-stage quorum fermentation at a 100-1 concentration ratio. We have generated a select strain of *S. cerevisiae* on prebiotic RAW molasses to yield the highest purity and quality of SYNBIOTIC raw nutrients. Our live bioactive *S. cerevisiae* is not to be confused with waste brewer's yeast, depleted after beer and alcohol fermentation products or other yeast supplements on the market which have no beneficial biological activity. Our vacuum-packed (not freeze-dried) **MultiNutraFood-100x** is an excellent source of SYNBIOTIC B-vitamins, protein, chromium and trace minerals and has the highest concentrations of organic zinc anywhere. Zinc has been shown to:

- **Reduce risks for prostate cancer** (*Nutrition and Cancer* 2009; 61:2)
- **Nourish Immune Anti-infective and Anti-inflammatory Actions** (*Am J Clin Nutr* 2007 85:3; *Pediatrics* 2001; 108:6; *Alternative Medicine Review* 2000 5:1 *Ann Intern Med* 1996 125:2 *J Rheumatol* 1996 23:6; *Cahiers Sante* 1996; 6:4) –
- **Assist in detoxification & accelerate healing** *Anaesthetist* 1975 24:8
- **Have anti-Diabetic effects** - *Journal of Nutrition & Food Science* 36:6; 2006; *Metabolism* 50:1 2006

Our unique quorum fermentation methodology yields a huge nutritional cargo of synbiotic nucleotides. Researchers report incredible immune enhancing effects of nucleotides (*British Journal of Nutrition* 2007:98; *Acta Paediatrica* 2007:88; *Journal of Leukocyte Biology* 2003:73; *Journal of Nutrition* 1994:124; *American Institute of Nutrition*, 1994:124; *Journal of Nutritional Immunology*, 1995:4; *Transplantation* 1992:53; *Journal of Nutrition*, 1994:124; *Anticancer Research* 1995:15; *J of Parenter Enter Nutrition* 1986:10). Using the latest molecular biology research on *S. cerevisiae* fermentation, we have discovered how to maximize the nutrient potential of food (*Adv Microb Physiol* 28:1986; *Curr Genet* 29; 1995; *Adv Microb Physiol* 22:1981; *Mol Microbiol* 16:1995; *J Bacteriol* 176:1994; *Enzyme Microb Technol* 26:2000).

If you take vitamins, you know the hassle and expense (\$800) of buying 30-40 different supplement bottles and opening them every day. Let's face it—with longer work hours, rush hour traffic, and business trips, you don't always have the time to eat right. And, most supplements out there are synthetic or moldy doing far more harm than good. Following nature's recipe for whole raw food nourishment provides the kind of nutrition that our cells need to function optimally.

**Multi-NutraFood-100x™** ends this problem by giving you an RAW, Cultured organic food SYNBIOTIC nutrients with thousands food-based nutrients and antioxidants. Just 4 capsules daily, gives you above and beyond the nutritional value of taking handfuls of pills or eating lots of RAW foods daily.

**Multi-NutraFood-100x™** provides the most advanced and comprehensive nourishment, working to keep the body healthy—all systems in sync, with vitality and energy to spare—without risks or side effects. \*\*

**Proprietary Ingredients:** RAW, living probiotic *Saccharomyces cerevisiae* aerobic multi-stage fermentation at a 100-1 concentration ratio of fermented on prebiotics of RAW molasses to yield the highest purity and quality of SYNBIOTIC raw nucleotides, B vitamins, protein, MOS, organic (covalent) zinc, chromium and trace minerals. NOTE: *Candida Albicans* is negative and verified by DNA fingerprinting. **Keep refrigerated after opening package.** Our live bioactive *S. cerevisiae* is not to be confused with waste brewer's yeast, depleted after beer and alcohol fermentation products or other yeast supplements on the market which have no beneficial biological activity. Our vacuum-packed (not freeze-dried) **MultiNutraFood-100x** is an excellent source of SYNBIOTIC B-vitamins, protein, zinc, chromium and trace minerals. Researchers have noted that during multi-stage *S. cerevisiae* fermentation, one can control external glucose levels and in oxygen to produce an abundance of synbiotic nutrients and no ethanol

## Harness the Nutritional Power of Nature!

Until **Multi-NutraFood-100x™** there's been no option available for people to get concentrated RAW food pre-digested nourishment. No supplement can compare to the benefits associated with consuming fermented and concentrated RAW foods. Researchers now know that the uptake of glucose into *S. cerevisiae* is controlled by multiple hexose transporters (*Microbiol Mol Biol Rev* 63:1999), which have different substrate specificity and affinity, and are expressed under different, overlapping conditions (*Eur J Biochem* 245:1997). Novel nutrient formations are expressed in multi-stage fermentation in aerobic conditions (*Adv Microb Physiol* 28:1986; *Curr Genet* 29; 1995; *Adv Microb Physiol* 22:1981; *Mol Microbiol* 16:1995; *J Bacteriol* 176:1994; *Enzyme Microb Technol* 26:2000).

**IMAGINE getting 36% protein; 30% nucleotides; 25% mannan-based oligosaccharides (MOS) that interfere with the colonization of intestinal pathogens while feeding beneficial commensal-probiotic flora and huge payloads of SYNBIOTIC nutrients... all in one supplement!**
