

ReishiPlex™ (60 liquid Vcaps) Immuno-Restorative Nourishment

When it comes to the complexity and reciprocity of the immune system, few food concentrates offer the correct balance of nourishment to help restore immune health. Immune disorders and can fuel plaque growth, cause crises, and ignite non-stop inflammation. And, when the liver is sluggish, viruses replicate constantly and the immune system loses its ability to fight invading microbes. This means that doctors should *restore* rather than *modulate* an immune response. Restoration of immune reciprocal balance is the key to having a healthy and strong immune system.

Over two decades of research have gone into the design of ReishiPlex™. This formula is so good that it has remained unchanged for over 6 years. In sourcing Reishi mushroom, we found that all powdered 1:1 reishi was weak and moldy. To stop the mold from growing we use a powerful 8:1 liquid concentrate of mold-resistant Reishi mushroom. And, we've added food-based bitters and herbal food concentrates to promote bile flow and the healthy excretion of toxins (*Bilberry Berry, Turmeric Root, Artichoke leaf, Slippery Elm Inner Bark, Hyssop Flowering Herb, Dandelion Root & Leaf, Fennel Seed, Gravel Root, Thyme Leaf, and Wild Yam Root*). This liquid Vcap can nourish the ability of the immune system to protect itself with disease-inhibiting compounds like *Hemicellulose (AHCC), polysaccharides, polysaccharide-peptides, nucleo-sides, triterpenoids, organic germanium, complex starches*, and more! **

Microbes today are tenacious and form tough, multilayered, mineral encrusted communities (biofilms) when the liver (the frontline of the immune defense) is not nourished efficiently. Reishi has natural anti-histamine and immune system balancing effects in allergic patients (*Townsend Letter 2006; 78-81*). Other researchers report that Reishi is antibacterial, anti-inflammatory, anti-tumor, anti-viral through it interferon production, anti-herpetic, lowers blood pressure, moderates blood sugar, strengthens the cardiovascular system, reduces cholesterol, enhances the immune response, is a nerve restorative
