

DOCTORS – Discover the Raw Food Power of Fermented Sea Buckthorn Fruit Berries! High in Vitamin D, A, C, E, EFAs, Polar Lipids, & powerful antioxidants!

University of Delhi and Jawaharlal Nehru University (India) researchers found that it is the ideal RAW food nutriture for gastric and duodenal ulcers or any kind of inflammation in the body (*Int J Sustain Dev World Trop Sci*, 1991, 31; *Himalayan Paryavaran*, 1994, 2; *Seabuckthorn*, 1991, 4; *Ecol.*, 1994, 1). The fermented fruit berries contain nature's richest source of natural vitamin C and polar lipids (*J Agric Food Chem*, 2002, 50; *J Food Sci Technol Mysore*, 2003, 40; *Eur Food Res Technol*, 2004, 219; *Curr Sci*, 2005,88). Loaded with protein and hundreds of known and unknown precious nutrients that are quickly destroyed in our foods due to shelf life nutrient losses, it has 6 kinds of fat-soluble vitamins, 22 kinds of fatty acids, 42 kinds of lipids and 36 kinds of flavonoids and phenols.

The increasing onslaught of ever-increasing pollution demands that we find a way to quickly eliminate PITs and mycotoxins which activating vagal efferent function. Don't be fooled! Over 96% of antioxidant supplements labeled "natural" are synthetic, heat-damaged, degraded or moldy! Our food is depleted with little or no antioxidant protection, our bodies are in desperate need of high quality, RAW food nourishment.

Results of chromatographic analyses have indicated that the ripe fruit of seabuckthorn berries contains malic acid, oxalic acid and other organic acids that can rid the body fast of mycotoxins and many toxic chemicals. Chlorogenic acid facilitates the biosynthesis of gastric acid, bile and stimulates gastric juice secretion. Nature's most precious RAW food nutrients are found in these berries that nourish and maintain the integrity of the gastroduodenal juncture or the excretion-secretion channel of the body.

Clinically, added super-concentrated cayenne, rich in capsinoids, activates TRPV1 receptors in the gut (*Amer J of Physiology-Regulatory Integrative and Comparative Physiology* 292: 2007; *Biosci Biotechnol Biochem* 71:2007; *Neuropharmacol* 44: 2003) to promote gastroduodenal healing with an increased flow of protective mucus in the gut and documented anti-inflammatory action via lowering of neuropeptide substance p and stimulation of vagal afferent activity (*Alimentary Pharmacology and Therapeutics* 2002;16(6); *British Medical Journal* 1984;288; *Critical Reviews of Food Science and Nutrition* 2006;46(4); *Pharmacol Res* 1995;32; *Gastroenterol* 1989;96; *Dig Dis Sci* 1995;40 ; *J Gastroenterol Hepatol.* 1998 Oct;13(10)

Sea Buckthorn, whose latin name translates to "horse light" was originally used to give horses a shiny coat and help improve their eyesight, in turn "giving light." Indigenous evidences and scientific evidence proves that these berries contain a super-rich cocktail of rare and extremely powerful antioxidants. Supercritical Sea Buckthorn seed oils sold by others do not have this antioxidant power nor do the pasteurized and bottled juices. Raw seabuckthorn must be flash fermented and CO2 extracted to preserve its vital nutrients as all berries oxidize in just a few days after harvesting.

Here's a brief synopsis of what researchers are saying about Sea Buckthorn Fruit berries:

- **Anti-Fat Cardiac Nutriture**** - using a double blind control test, researchers at the West China Medical University found it effective against coronary heart disease and could remit angina and improve the ischemic electrocardiogram and inhibit platelet aggregation (*Hippophae* 6 (2): 1989; *J Chinese Pharmacology* 5 (1), 1989; *1989 Proceedings of International Symposium on Seabuckthorn, Xi'an, China*). These researchers also noted that it had anti-fat effects, normalizing cholesterol and triglycerides. Containing natural coumarin, they noted how it strengthens the function of the capillaries and function as a antispasmodic agent and anti-fibrinogenic agent .
- **Anti-Anxiety Nutriture**** - Rich in natural 5-HT in a free or grouped stat that acts as a neurotransmitters and helps to regulate human emotion, blood pressures and normal hormone levels(*Hippophae* 1 (4), 1988; *Hippophae* 3:3, 1990) and prevents liver injury from toxicants (*J Chinese Herbs* 18:11, 1987).
- **Anti-Radiation effects**** - rich in phenols and quassin, proven to be effective against oxidation and radiation (*Hippophae* 1 (4), 1988; *Hippophae* 3 (3), 1990)
- **Anti-tumor Effects**** - rich in anti-tumor compounds (leucocyanidin & quassin) (*Hippophae* 1:4,1988; *Hippophae* 3:3, 1990)
- **Digestive Nutriture**** - Chlorogenic acid and other phenol compounds can facilitate the biosynthesis of gastric acid, stimulate gastric juice secretion, strengthening the function of capillaries, and, nourish the thyroid(*Seabuckthorn* 1992; 5 (1): 7-15)
- **Anti-Carcinogenic & Anti-Mold Effects**** - Exceeds ascorbic acid in removing mold toxin like the cancer-causing alfatoxin mold (*Hippophae* 2 (3), 1989; *Proceedings of International Symposium on Seabuckthorn, Xi'an, China*, 1989; *J. Nutrition* 1:1, 1989) while restoring healthy levels of Natural Killer cells to fight cancer (*Hippophas rhamnoides L. Proceedings of the International Symposium on Seabuckthorn, Xi'an, China*) is effective against human lymphatic leukemia (P388) & B16 strains and can kill the cancer cells of S180 and P388 and inhibit growth of the cell strains of the human gastric carcinoma (SGC7901) & lymphatic leukemia (L1200 & K562).
- **Anti-Senility Effects**** - rich in SOD.Researchers at the Chinese Academy of Sciences & Shanxi Medical College discovered it postpones senility and prevents lipid peroxidation (*Proceedings of the International Symposium on Seabuckthorn, Xi'an, China*).

In addition to our unique 30:1 fermented sea buckthorn fruit berries, we've added 200:1 Schizandra Berries which researchers say is a powerful nutritive for the liver, endocrine, and immune system (*Phytomedicine* 1997: 4: 469-72; *PhytoMedicine* 1996: 3; 237-40; *Phytomedicine.* 2003 May;10(4):271-85), 4:1 Cayenne Pepper, Red Root and Mullein Leaf.

Dosing: 1 vcap once or twice daily – Always ask your doctor before starting this product
